

Carbon Reduction Plan

Supplier name: Macure Pharma UK Ltd

Publication date: 15th July 2025

Commitment to achieving Net Zero

Macure Pharma UK Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
The baseline exercise was carried out for the first time for the year 2023 for the bidding entity – Macure Pharma UK Ltd. The carbon footprint adopts the scope of the PPN 06/21 regulations and standards, and all relevant Scope 3 categories have been included.	
Baseline year emissions¹:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1²	0
Scope 2³	0.05
Scope 3 (Included Sources)	4.89 Includes the following Scope 3 source categories: 4. Upstream transportation and distribution 5. Waste generated in operations 6. Business travel 7. Employee commuting 9. Downstream transportation and distribution
Total Emissions	4.94

¹ Baseline numbers have been adjusted to reflect the UK numeric format.

² Macure Pharma UK Ltd has no direct emissions from its operations in the UK. All reported emissions are categorized under Scope 2 & 3.

³ Scope 2 emissions originate from our WeWork London office space, calculated using the market-based approach.

Current Emissions Reporting

Reporting Year: 2024 (January 1 st 2024 to December 31 st 2024)	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0
Scope 2	0.08
Scope 3 (Included Sources)	4.37 Includes the following Scope 3 source categories: <ul style="list-style-type: none"> 4. Upstream transportation and distribution 5. Waste generated in operations 6. Business travel 7. Employee commuting 9. Downstream transportation and distribution
Total Emissions	4.45

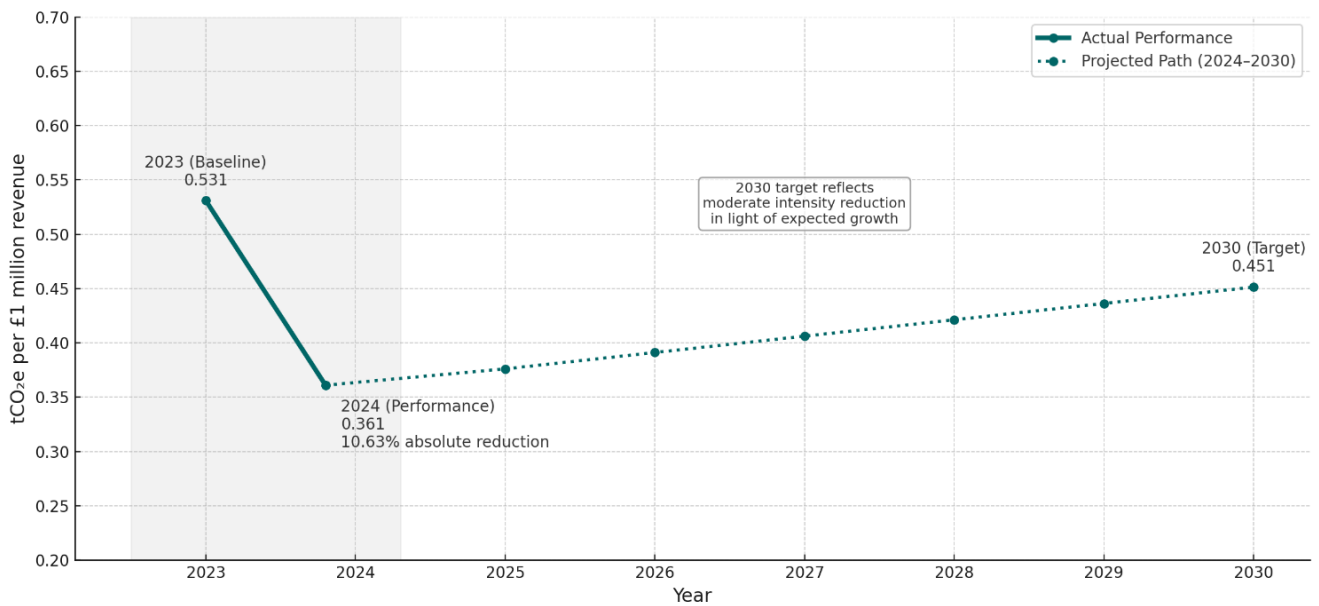

Emissions Reduction Targets

To support our 2050 Net Zero goal, we have implemented the following carbon reduction target.

Intensity-Based Scope 3 Emissions Target: Reduction of 15% by 2030

- In 2025, we established an intensity-based Scope 3 emissions reduction target, building on our first full year of baseline reporting from 2023. With 4.89 tCO₂e in Scope 3 emissions and £9.2 million in revenue that year, our baseline emissions intensity was calculated at 0.531 tCO₂e per £1 million in revenue. While we did not publish a formal target in 2024 due to limited historical data, we still achieved a 10.63% reduction in absolute Scope 3 emissions compared to the baseline year. In 2024, driven by revenue growth to £12.1 million and a reduction in absolute emissions, our emissions intensity fell to 0.361 tCO₂e per £1 million in revenue—representing a 32% improvement compared to the 2023 baseline.
- Looking ahead, our target is to reduce Scope 3 emissions intensity by 15% by 2030, aiming for 0.451 tCO₂e per £1 million in revenue. This approach ensures that emissions are decoupled from financial growth, allowing for sustainable business expansion. Key initiatives supporting this goal include logistics optimization, low-carbon transport solutions, closer supplier collaboration, and packaging innovation. With a strong data foundation and significant early progress, we are well-positioned to achieve and potentially exceed our 2030 ambition.

Intensity-Based Scope 3 Emissions Target: Reduction of 15% by 2030

Carbon Reduction Initiatives

Planned initiatives include:

- We want to collaborate with our transportation partners to optimise logistics through route optimisation and consolidating shipments, opting for an electrified fleet, and encourage working towards green certificates for sustainable logistics. We would like to track the carbon emissions data more closely and encourage our transportation partners to actively monitor their overall carbon footprint.
- For product transparency, we aim to thoroughly map all our product components to transition to eco-friendly alternatives, including primary, secondary, and tertiary packaging. This requires close collaboration with our suppliers and sub-suppliers involved in the manufacturing processes.
- To increase the likelihood of obtaining certification by recognised standards and regulations in the future, we are laying the groundwork for sustainability and environmental considerations.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

⁴ <https://ghgprotocol.org/corporate-standard>

⁵ <https://www.gov.uk/government/collections/government-conversion-factors-for-company-reporting>

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Macure Pharma UK Ltd
